“Planning to start a small business requires a great location. We decided to move from the UK to the Dallas area due to the region’s broad technology base. A little research led us to narrow the search to Plano due to its excellent school system, thriving industry and growth that is moving at warp speed. The vast amount of like industry within Plano and surrounding cities has allowed us to grow at a rapid pace.

The City of Plano embraces the technology sector; Plano is our home.”
