

Howard Cho

Founder, President & CEO
CVE Technologies

"The City of Plano assisted and supported us in finding the best location to expand and settle our business. The City's incentives most definitely helped us relocate. Plano has been the best place for our business with its steady labor supply, access to nearby major highways and thriving technological business environment. Most of all, the friendliness and constant support from the community and from within the City of Plano government has helped to guide us in the pursuit of our vision and dream for a better tomorrow. I am so privileged to be a citizen, business man and resident of the City of Plano."
